

## **TAB 4: STATION INFRASTRUCTURE**

CI-0402 Station Sizing

## **STATION SIZING**

The following table shows typical space allocations for components of a GO Transit Rail Station building with a two (2) seller ticket sales layout. These spatial allocations are a guide for design and layout of the GO Station Building. The information provided below should be read in conjunction with the functional figure showing spatial relationships. Further analysis is required based on specific site conditions such as ridership projections, arrival modes, interface with other Transit Services, stations designated as "Mobility Hubs", line station, or terminal station, bus terminal or Lay-By requirements (including drivers facilities), and other station specific requirements.

When more than two ticket sellers are required, provide incremental space allocations subject to GO approval.
